

BABE WAS BORN AFTER MOTHER KILLED IN FALL AND SURGEON IS HERO

Brooklyn, N. Y., April 25.—A woman fell from a window through an air shaft in the house at 103 Columbia street late yesterday afternoon and was killed. She was Maria Bucchiera, aged 22 years, the pretty young wife of an Italian longshoreman. Their rooms were on the third floor and Mrs. Bucchiera sat on the sill of the window leading to the air shaft with her baby girl, Maria, aged one year, in her lap. The mother was accidentally overbalanced and she and the child pitched headlong to the cellar. The woman's skull was fractured and death was instantaneous. Beyond a few bruises, the little girl was uninjured.

The accident caused much excitement among the other women in the house, because Mrs. Bucchiera had expected to become a mother in a very few days. A call was sent to the Long Island College Hospital nearby for a doctor, and Surgeon Francis Nug came in a hurry with the ambulance. There was so much commotion in the house that the young physician did not for a time realize that prompt action on his part might save another life. He saw that the woman was dead, and he imagined that the excitement was due to the concern over the condition of the little girl, Maria, who was crying in one of the neighbor's arms. It took twenty minutes for Dr. Ring to assure himself that the child had not been seriously hurt, for he made a most careful examination of its little body, seeking fractures. There was none; only some bruises on the legs.

The doctor was about to leave when he was made to understand the real situation. A quick consultation over the telephone with Coroner Senior followed, and the young doctor got the permission he sought. In a few minutes there was another baby, a little girl, in the dusky cellar, but it was apparently lifeless. Its birth had been delayed for so long, the doctor thought, but he discovered a flutter of life and made a heroic endeavor to revive the dying spark. For an hour and a half the physician sought to establish respiration by lip to lip inspiration. It was a task that taxed his strength and patience. His struggle in the interest of humanity was watched with silent admiration by half a dozen of the women neighbors. Slowly his reward came. There was a gentle sigh from the newborn babe, and soon it was breathing unaided.

Somebody suggested baptism, and a formal christening ceremony followed. The baby was called Frances, out of compliment to the doctor. Then he bundled it up in a shawl and ran with it to the hospital. And as he went he was cheered to the echo by the neighbors. Last night the people at the hospital said it would live, Frances was the most important patient in the institution. "I'm glad I saved the little one's life," said Dr. Ring with professional enthusiasm.

Why Constipation Injures.
The bowels are the natural sewerage system of the body. When they become obstructed by constipation a part of the poisonous matter which they should carry off is absorbed into the system, making you feel dull and stupid, and interfering with the digestion and assimilation of food. This condition is quickly relieved by Chamberlain's Tablets. Obtainable everywhere.

DRINK A GLASS OF REAL HOT WATER BEFORE BREAKFAST.

Says we will both look and feel clean, sweet and fresh and avoid illness.

Sanitary science has of late made rapid strides with results that are of untold blessing to humanity. The latest application of its untiring research is the recommendation that it is as necessary to attend to internal sanitation of the drainage system of the human body as it is to the drains of the house.

Those who are accustomed to feel dull and heavy when we arise, foul tongue, heavy breath, acid stomach, can, instead, feel as fresh as a daisy by opening the sluices of the system each morning and flushing out the whole of the internal poisonous stagnant matter.

Everyone whether ailing, sick or well, should, each morning before breakfast, drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver and bowels the waste, indigestible, and poisonous matter, thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleanses out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enjoying your breakfast the phosphate hot water is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constipation, biliousness, stomach trouble, rheumatic stiffness, others who have yellow skin, blood disorders and sticky complexions are urged to get a quarter pound of limestone phosphate from the drug store. This will cost very little, but is sufficient to make anyone a pronounced crank on the subject of internal sanitation.

JAMES W. GERARD

American Ambassador In Berlin, Who Handled Correspondence on Serbianes.

WHAT WOULD HAPPEN IF WAR IS DECLARED?

United States Would Lend Moral and Financial Aid.

Should the worst come of the present crisis in the relations between the United States and Germany and the two countries declared war upon each other what part would this country play?

This is a question that has been asked many times, and the answer is illusive.

Would the United States army be sent to the trenches in Flanders and around Verdun?

Would the United States navy be sent to aid the allied squadron in patrolling the North sea and assist in making the blockade of Germany complete?

Would a call be issued for volunteers in this country and the recruits sent abroad to begin training for service?

All of these results are possible, but none are probable. It is most likely that the United States, if actually drawn into the war, would play a part a great deal similar to that of Japan today. Japan and Germany are at war. But the only part that Japan has played is to send munitions to Russia, with maybe a few officers to direct the movements of the hosts of Russian troops. True, she has given her complete moral and financial support to the allies.

The same course would probably be pursued by the United States. In the event of actual warfare this government would lend its undivided moral, commercial, industrial and financial support to the entire allies, but it is doubtful if Americans would actually participate in the world war.

Our rapidly growing steel and munition factories would be put to work overtime in the efforts to turn out as many shells as possible. The German liners now interned in various American ports would be seized by the government and put into service carrying all kinds of supplies to the allies.

The bankers of the United States would stand solidly behind the allies and lend all possible financial aid, and this probably would be one of the deciding features of the war. It has often been said that the side with the most money would be the ultimate victor, and with the United States on the side of England, France, Russia and Italy there is no doubt that the financial tide would be turned against the Teutonic powers.

PRESIDENT'S STAND ON SUBMARINE WAR.
The "sacred and indisputable" rules of international law, as feeling noncombatants which the United States insisted Germany should observe in her submarine warfare, may be summed up as follows:

1. Freight or passenger ships shall not be attacked without warning. 2. They shall not be fired on unless they endeavor to resist or escape capture. 3. Before being taken they shall be visited and searched for evidence to establish their belligerent nationality or the presence of a contraband cargo. 4. They shall not be sunk until proper provisions have been made for the safety of passengers and crews. 5. Placing them in lifeboats and turning them adrift is not sufficient unless the condition of the sea and proximity of land or other vessels warrant the belief that they will be rescued.

SALTS IF KIDNEYS OR BLADDER BOTHER

Harmless to Tush Kidneys and Neutral e Irritating Acids

Kidney and bladder weakness result from uric acid, says a noted authority. The kidneys filter this acid from the blood and pass it on to the bladder, where it often remains to irritate and inflame, causing a burning, scalding sensation, or setting up an irritation at the neck of the bladder, obliging you to seek relief two or three times during the night. The sufferer is in constant dread, the water passes sometimes with a scalding sensation and is very profuse; again, there is difficulty in voiding it.

Bladder weakness, most folks call it, because they can't control urination. While it is extremely annoying and sometimes very painful, this is really one of the most simple ailments to overcome. Get about four ounces of Jad Salts from your pharmacist and take a tablespoonful in a glass of water before breakfast, continue this for two or three days. This will neutralize the acids in the urine so, it no longer is a source of irritation to the bladder and urinary organs which then act normally again.

Jad Salts is inexpensive, harmless, and is made from the acid of grapes and lemon juice, combined with lithia, and is used by thousands of folks who are subject to urinary disorders caused by uric acid irritation. Jad Salts is splendid for kidneys and causes no bad effects whatever.

Here you have a pleasant, effervescent lithia-water drink, which quickly relieves bladder trouble.

City Candidates' Cards

FOR MAYOR

I hereby announce myself a candidate for re-election as mayor of the City of Anderson, subject to the rules of the democratic primary election.

J. H. GODFREY.

I hereby announce myself a candidate for Mayor for the City of Anderson, subject to the rules of the democratic primary election.

WADE A. SANDERS.

FOR ALDERMAN, WARD 1

I hereby announce myself as candidate for alderman from Ward 1, subject to rules of the city democratic primary election.

W. E. ATKINSON.

FOR ALDERMAN, WARD 2

I hereby announce myself a candidate for re-election as alderman from Ward 2, subject to the rules of the democratic primary election.

WALTER DOBBINS.

The friends of A. M. McFall hereby announce him as a candidate for alderman from Ward 2, subject to the democratic city primary.

FOR ALDERMAN, WARD 3

I hereby announce myself a candidate for alderman from Ward 3, subject to the rules of the city democratic primary election.

ERNEST DUGAN.

I hereby announce myself a candidate for re-election as alderman from Ward 3, subject to the rules of the democratic primary election.

CHAS. F. SPEARMAN.

I hereby announce myself a candidate for alderman from Ward 3, subject to the rules of the city democratic primary election.

S. G. BRUCE.

FOR ALDERMAN, WARD 4

I hereby announce myself a candidate for alderman from Ward 4, subject to the rules of the city democratic primary election.

F. E. ALEXANDER.

I hereby announce myself a candidate for re-election as alderman from Ward 4, subject to the rules and regulations of the city primary.

JOHN H. TATE.

FOR ALDERMAN, WARD 5

I hereby announce myself a candidate for re-election as alderman from Ward 5, subject to the rules of the democratic primary election.

R. R. KING.

I hereby announce myself as a candidate for alderman from Ward 5, subject to the rules of the city democratic primary.

A. G. MEANS.

FOR ALDERMAN, WARD 6

I hereby announce myself a candidate for re-election as alderman from Ward 6, subject to the rules of the democratic primary election.

ROBT. L. CARTER.

I hereby announce myself a candidate for alderman from Ward 6, subject to the rules of the city democratic primary election.

W. W. LYLES.

Hot Water Each Morning Puts Roses in Your Cheeks

To look one's best and feel one's best is to enjoy an inside bath each morning to flush from the system the previous day's waste, sour fermentations and poisonous toxins before it is absorbed into the blood. Just as coal, when it burns, leaves behind a certain amount of incombustible material in the form of ashes, so the food and drink taken each day leaves in the alimentary organs a certain amount of indigestible material, which, if not eliminated, forms toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishment to sustain the body.

If you want to see the glow of healthy bloom in your cheeks, to see your skin get clearer and clearer, you are told to drink every morning, upon arising, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washing the waste material and toxins from the stomach, liver, kidneys and bowels, thus cleansing, sweetening and purifying the entire

alimentary tract. Before putting more food into the stomach. Girls and women with sallow skins, liver spots, pimples or pallid complexion, also those who wake up with a coated tongue, bad taste, nasty breath, others who are bothered with headaches, bilious spells, acid stomach or constipation should begin this phosphated hot-water drinking and are assured of very pronounced results in one or two weeks.

A quarter-pound of limestone phosphate costs very little at the drug store, but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and freshens the skin on the outside, so hot water and limestone phosphate act on the inside organs. We must always consider that internal sanitation is vastly more important than outside cleanliness, because the skin pores do not absorb impurities into the blood, while the bowel pores do.

Women who desire to enhance the beauty of their complexion should just try this for a week and notice results.—Advertisement.
